Abilitations Chewlery

Thank you for your purchase of Abilitations Chewlery, the chewable jewelry. Chewlery was designed (by Ilana Danneman, PT) to create an avenue for good, oral-motor activity other than chewing on clothing or less desirable objects. Chewlery is non-toxic, but should be washed with mild soap and water before each use. It is not intended for children under 3 or those who intend to eat things. Like all jewelry it should be used under supervision and removed when on playgrounds and environments where it could get hung. For other items that encourage good oral motor activity or questions please call Abilitations at 800-850-8602. Chewlery has a 1-year, unconditional guarantee.

For other items that encourage good oral motor activity or further questions, please call Abilitations toll free at 800-850-8602.
